

# FASTFACTS

## World-renowned expertise

AHN Wexford Hospital opened in 2021, to bring the latest in comprehensive medical care to the North Hills. Along with emergency services, robotic-ready operating rooms, and an adult intensive care unit, the hospital offers leading-edge specialty care in cancer, neurology, cardiology, radiology, gastroenterology, rheumatology, endocrinology, orthopaedics, and women's health.

AHN doctors and clinical specialists work in multidisciplinary teams to provide personalized, comprehensive care for each patient and family.

### EMERGENCY MEDICINE INSTITUTE

We offer critical 24/7 access to highly skilled emergency care providers, coordinating with LifeFlight helicopters and local EMS for emergency transport.

- Emergency care is centered on the needs of our patients with short wait times, privacy, and efficiency.
- Pediatric hospitalists, dedicated to caring for our smallest patients, are available 24/7.
- Prescriptions are delivered to patients before discharge.

### WOMEN'S INSTITUTE

At AHN, we care for women throughout their lives with obstetrics, midwifery, NICU care, primary care, breast care, midlife care, advanced gynecologic surgery, pelvic health, bone density testing, behavioral health, and all medical subspecialties. Over 7,000 babies are born each year at five AHN hospitals. At AHN Wexford Hospital:

- Women can experience personal nursing care and family-centered childbirth in our spacious birthing suites and Level II NICU designed for high-risk pregnancies.
- Large patient rooms with floor-to-ceiling windows are flooded with natural light, giving families maximum comfort, security, and bonding time with their baby throughout their stay.

### CANCER INSTITUTE

We treat many types of cancer with the latest advancements in surgery, radiation, chemotherapy, biologic therapy, immunotherapy, genomics, and pathology testing. We have one of Pennsylvania's largest cell transplant programs and continue to adopt new technologies to improve patient results.

- Our on-campus cancer infusion center promotes patient privacy and access to some of the latest treatments and clinical trials.
- Personalized therapies precisely target tumors and preserve healthy tissues, while nurse navigators help cancer patients coordinate tests and treatments.
- The \$80 million AHN Cancer Institute at Allegheny General Hospital gives patients access to more than 200 clinical trials and is the nucleus for research, clinical trials, and medical education.

### CARDIOVASCULAR INSTITUTE

We keep hearts beating using multimodality imaging and treatment with new medicines, advanced hybrid procedures, and implantable devices to fight heart, thoracic, and vascular disease.

- Minimally invasive surgery in state-of-the-art operating rooms can reduce the risk and speed recovery for thoracic and vascular surgery patients.
- Our modern cardiac catheterization lab is available 24/7 for emergency, diagnostic, and interventional procedures.
- Our on-campus AHN Heart Center offers innovative, noninvasive imaging, testing, assessments, treatment, education, and preventive cardiac care customized for our patients.

### ORTHOPAEDIC INSTITUTE

Highly qualified physicians specialize in treating orthopaedic injuries and complex musculoskeletal conditions to help patients regain mobility and health, including robotic-assisted same-day joint replacement surgery.

- AHN Pediatric Orthopaedic Institute cares for the unique orthopaedic needs of children in a family-centered way.
- Elite sports medicine specialists help athletes overcome injuries and return to the game.
- Comprehensive, coordinated concussion therapies give patients focused treatment plans so they can get back to everyday activities.

### SURGERY INSTITUTE

Some of the region's leading surgeons use their expertise to provide the latest innovative, laparoscopic, and minimally invasive surgical technologies to:

- Treat both routine and complex surgical conditions.
- Offer a faster recovery, with less pain, and a shorter hospital stay.
